

Ola Abu Saalek

Artificial Intelligence and Data Science Student

olaabusaalek@gmail.com | 0778122689 | Jordan - Amman

I have a passion for the field of artificial intelligence and data science, I am particularly interested in robots and their assembly and parts. I seek to increase my practical experience by applying what I have learned and I am looking for an opportunity to develop my skills in the field of programming and data analysis

EDUCATION

Tafila Technical University

Artificial Intelligence and Data Science Student , forth year

Personal SKILLS

2021 - 2025

- Effective in team work
 - Time management
 - Flexibility and the ability to work under pressure
 - multi-tasking
-

TECHNICAL SKILLS

- Software(python/c++/java/java script)
 - Data analysis
 - Database management
 - Office software
-

PROGRAMS

I have experience in

- Jupyter
 - Visual Studio Code
 - Matlab
 - Eclipse IDE for Java Developers
 - Oracle
-

PROJECTS

- **Design a fuzzy traffic light control system**
determine the duration of a green signal at in intersection using matlab and Jupyter
 - **Smoking visual visulization**
analyze impact smoking on health using the Python language on the Jupyter program
 - **Create EER for movie**
design enhance entity relationship model for a movie database structure. This will involve identifying the entities, attributes, and relationships between the entities
 - **Model that predicts heart disease using KNN algorithm**
by entering some values,such as the cholesterol level,through the GUL interface,and the result is either 1 infected or 0 not infected using Jupyter program.
-

CERTIFICATIONS

- Fundamentals of Internet and Correspondence - Edraak
 - Computer Fundamentals -Edraak
-

VOLUNTEERING

- **Artificial Intelligence Team at Tafila Technical University**

It aims to spread awareness among students of the major about its importance and role
